

Class 19 Pollinator Garden  
Section 1 Garden registration

Continuing in 2019

Pollinator Garden Contest as part of the Wellesley  
Township Fall Fair

**Criteria:**

- Must be a garden in the Township of Wellesley and surrounding area created and maintained by the resident.

**Ideas:**

- A pollinator garden is a safe place for insects and birds, also providing them with shelter e.g. vegetation layers, drying stems & leaves, bare soil; and water eg. birdbath with pebbles, damp sand.
- A pollinator garden should include a variety of flower shapes and bloom times to encourage different types of pollinators to visit your garden for pollen and nectar from spring to fall; or host plants for the larval stage e.g. milkweed, dill family, willow, oak.
- A pollinator garden should be pesticide free and ideally contain some native plants that have co-evolved with pollinators. For the contest include at least five of these and/or fertile cultivars of natives i.e. check that they still produce pollen and nectar.

Eligibility: Residents of Wellesley Township and surrounding area.

Entry Fee: there is no entry fee for this class

Official Wellesley Township Fall Fair Sign on your lawn or driveway
